Tomato Diseases and Disorders - UCANR

Symptoms of bacterial speck are tiny, dark brown to black spots with a surrounding yellow halo. Severity of both diseases is increased by wetness of fruit and foliage from sprinklers, rain, or heavy dew. There are some tomato varieties with resistance to bacterial speck but very few with resistance to bacterial spot.

A Visual Guide: Tomato Foliage, Stem & Root Problems

Gray leaf spot affects mainly the leaves of tomatoes, starting with the oldest leaves, although it can also infect the stems on the plant. 2 It does not infect the fruit, although the disease can be harbored in the seeds of the infected plant. Symptoms: Small, dark spots that can be seen on both the top and bottom surfaces of the leaves.

20 Common Tomato Plant Problems and How to Fix Them

This destructive disease of tomato foliage, petioles and stems (fruit is not infected) is caused by the fungus *Septoria lycopersici*. Infection usually occurs on the lower leaves near the ground, after plants begin to set fruit. Numerous small, circular spots with dark borders surrounding a beige-colored center appear on the older leaves.
