Small Block Chevy 327 Identification. "1967 Chevrolet" is Copyrighted by Flickr user: Hugo90 (JOHN LLOYD) under the Creative Commons Attribution license. The Chevy small block 327-cubic-inch V-8 engine can be identified by its engine code stamping numbers. Specific numbers identified the time period it was built and its horsepower range.

### Small Block Chevy 327 Identification | It Still Runs

The Chevrolet small-block engine is a series of automobile V8 engines built by the Chevrolet Division of General Motors using the same basic, and for a V8, smaller engine block. These blocks are referred to as the "Gen I" small-block, the subsequent "Gen II" LT, and "Generation III/IV" LS, along with the current "Generation V" (LT/EcoTec3) engines. The Chevrolet big-block is a series of large displacement V8 engines that were developed and used in the 1950s through the 1970s.

### Reference: Chevy Engine Block Casting Numbers

Look for the identification number on the engine block. The identification numbers on a Chevy engine with a small block V-8 are adjacent to the cylinder heads on the passenger's side, close to the front of the engine block. Look closely because the alternator blocks the identification number. The identification numbers on a Chevy big block V-8 engine are on the covering of the timing chain.

### How to Identify a Chevy Engine by Numbers | It Still Runs

The first one I usually use is the block casting number which is located at the back of the driver's side cylinder head and will look something like: 3970010. The other number is the block stamping ID which is (kinda like the name implies) stamped into a machined pad at the front of the passenger side cylinder head.

### Chevy Smallblock Decoding

All engines are stamped with an engine ID code, consisting of assembly plant code, production date and suffix code. The location of this code depends on the type of engine, typically as follows: Small Block Chevy: Machined pad in front of the passenger side cylinder head. Often hidden by the alterator.

### How to decode Chevy Engine Codes

Small Block Chevy Suffix Codes: HR - TBS. GM body designation. All these are identified here. Quickly, A = Chevelle, F = Camaro, X = Nova. If you're looking at the engine code - this is already known. If you're looking at the casting # information and it mentions 3970010 "A/F/X/Y/B".... basically this means "it's used in everything", whereas if it simply states "Y"... this means Corvette.

### Decoding small block Chevy engine suffix codes and stamped ...

L31. The Vortec 5700 L31 (VIN code 8th digit "R") is a 5.7L V8 truck engine. It is Chevrolet's last production Generation I small-block. The cylinder heads feature combustion chambers and intake ports very similar to those of the LT1 V8, but lacking the LT1's reverse-flow cooling and higher compression.
