# Unit 2 Day 6 Inequalities And Interval Notation

As recognized, adventure as capably as experience nearly lesson, amusement, as skillfully as treaty can be gotten by just checking out a books **unit 2 day 6 inequalities and interval notation** afterward it is not directly done, you could put up with even more with reference to this life, roughly the world.

We present you this proper as skillfully as simple pretentiousness to acquire those all. We allow unit 2 day 6 inequalities and interval notation and numerous ebook collections from fictions to scientific research in any way. in the midst of them is this unit 2 day 6 inequalities and interval notation that can be your partner.

Below is the Current Schedule for Unit 2: Inequalities with Notes, Homework, and any Class Activities that we did on the given dates.. Day 10: Inequalities TEST Day Thursday, October 20. Homework: None; Day 9: Inequalities Review Day Wednesday, October 19

### Falci, Jakob / Unit 2: Inequalities

Unit 5555: :: : Inequalities Lesson 6: Graphing Linear Inequalities  
Answer Key 1.  $-2x + y < -2$  2.  $x - 3y \leq -3$  3.  $3x - 4y < -8$  4.  $x + y > 3$  You can either find the x and y intercept or you can X intercept: let  $y = 0$ . Y-intercept: let  $x = 0$   $-2x + 0 = -2$   $-2(0) + y = -2$   $-2x/-2 = -2/-2$   $y = -2$   $x = 1$  \*\* Substitute (0,0)  $-2(0) + 0 < -2$

### **Unit 2 - Polynomial Equations and Inequalities - mrs ...**

In this unit, we learn how to solve linear equations and inequalities that contain a single variable. For example, we'll solve equations like  $2(x+3)=(4x-1)/2+7$  and inequalities like  $5x-2 \geq 2(x-1)$ .

## **Solving equations & inequalities | Algebra 1 | Math | Khan**

...

In this unit, we study inequalities like  $x+2y>5$  and graph them. This helps us see their solutions. We also explore systems of inequalities (multiple inequalities at the same time) and use them to describe real-world situations. Our mission is to provide a free, world-class education to anyone, anywhere.
